Ramat-Gan, Israel

ABOUT ME

Enthusiastic, self-learned, highly motivated, love to explore new technologies, contributing to open-source projects, speak at local meetups, makes the best Tahini you can imagine, and an amateur chef.

PROFESSIONAL HISTORY

2019 - current; Dreamed Diabetes, Developer. Joined a small team; Developed features in the backend and the various applications (web, native) which impacts people with diabetes, designed STPs, and helped to improve workflows with CI/CD.

2018; Taliaz, Developer. I took over the job of a single developer, implemented complex features, fixed bugs in the system and created new procedures in the daily workflow.

2011 - 2018; gizra, Lead Developer. Worked on big projects for clients such as Hebrew University and Harvard, mentored new developers, designed architecture and QA tests, CI integration, wrote blog posts, and share knowledge in local meetup events.

PROFESSIONAL HISTORY

Hasadna, Developer; since 2014; A non-profit organisation which creates tools for social activists and journalists based on open government data.

Open source contribution, since 2011 - Contributed modules to the Drupal community, created a couple of Django packages, Gatsby plugins, and aiming on giving back code as much as I can.
