### Academic education:

2016-2019: Bachelor's degree (B.Sc) Computer Science and Mathematics, in Ariel University.

During the degree i acquired knowledge and understanding of various problem-solving algorithms and specialized in Android development as part of a team project.

2020: During graduation for the CCNA and Cyber course at Net4u College  
Networking and Cyber security in Net4u Collage.

### Technological skills:

- JAVA programming: IO STREAMS, Object Oriented, SWING GUI
- C ++Programming in the language, C
- MYSQL Database (writing complex queries)
- Assembly
- Python
- Android Studio
- Java Script + Html + Css
- CCNA

### Work Experience:

2020:Internet Rimon Technical Support

11/2019-03/2020: Guide SAP PM systems for the Electric company at NESS

Technologies in Raanana.

03/2016-09/2019: During my degree, I developed in the project teams based on an Android-based application for managing meetings using Google's Firebase database.

My final project dealt with solving a puzzle problem using algorithms, the research was done on the complexity of the algorithms in solving the problem/

In addition, I served as a practitioner and teacher of mathematics and computers in parallel with my degree.

2015-2016: Private lessons at the Child Castle in Netanya in mathematics, practitioner and teacher for students in mathematics and computers.

### Military service-skills and teamwork:

2012-2015: Full military service as a warrior in the Armored Brigade - artilleryman in a "Mercava " tank in the Armored Corps in the "Barak" Brigade 188 Brigade

In my role I managed all the firing systems in the tank, meeting extreme pressure - conditions while encouraging and pushing the whole team to complete the task and strive for full success and teamwork whose whole is greater than the sum of its parts.

Ability to motivate employees in team work in order to achieve the group's goals in - the best possible way.

Down to the last detail to improve my and the entire team's products.

Continuous improvement of professionalism through self-feedback processes and teams.

Ability to manage crises and malfunctions while conducting investigations and drawing lessons for continuous improvement.

Ability to independently learn languages or work processes and feedback from end users to implement and implement improvements.

### Skills:

Good interpersonal skills, proactive approach.

Quick perception and ability to learn while working, managing initiative and organization

Common sense, ability to learn, ability to articulate clearly, self-confidence and proactivity

Knowledge and ability to analyze and draw conclusions from databases.

Loves to dive into details and find vulnerabilities and bottlenecks and offer solutions that contain the system.

**Functional characteristics:**

Responsibility, ability to lead a team, commitment to the task and organization, willingness to invest, coping with pressures, conveying messages in a positive constructive way, analytical ability, logical analysis.

Ability to manage good time and attention distribution, ability to understand and read system plans and training for details.

Willingness to work even during off-peak hours, compliance with security classification processes.

**Languages:**

Hebrew mother tongue; English-at a very high level.

**Various:**

Unique hobbies: nature walks, solving puzzles and playing music.

**Recommendations:**

Will be provided according to need and requirement, there is no impediment for me to carry out a security classification process to the highest level if necessary.
