About myself

I Hold a bachelor's degree in software engineering from the SCE Academic College of Engineering.
I am responsible, open-minded, commited to my work and a team player. I love new technologies, indepentant and quick learner.

Experience

2018-2020: "ELTA Systems Ltd (IAI)" in IT Team, Full stack.
I Worked with winforms, AngularJS, and C#.
I Also worked with sql server & oracle In building databases, stored procedures, functions, types and jobs.
I took part in improving performance of systems, and building databases from scratch. In addition I built a workflow management system.

2020-2021: "Emalogic", Full stack Web developer.
I Worked with AngularJS , Angular 10 + Redux (by Akita), C# webApi and sql server.
I Also wrote full system view design according to Moqups & Figma.
I led the development of one of the company's products. In this role I also took responsibility in fixing bugs and version uploads.

Currently I work at NLI , Jerusalem, as a Web developer.
I Work with Umbraco CMS + VueJS, C# webApi.

Military Service

Infantry combat service in the Combat Engineering Corps.

Volunteering

2016-2020 volunteer with the "Green Light" organization to fight traffic collisions.
